Bilateral Patterns

"Trading is risky. You could lose your entire investment. Trade responsibly and understand the risks."

I would recommend the following brokers for an exciting trading journey:

-  [Octa](#) - Trade and accumulate prize lots and exchange them for fantastic prizes.
-  [Deriv](#) - Trade various synthetic indices 24/7, with massive leverage and tight spreads.
-  [Exness](#) - Trade forex and commodities using unlimited leverage and tight or no spreads.

Risk Disclaimer!

"Trading CFDs involves leverage, which can amplify both profits and losses, potentially leading to the loss of your entire investment. Trade only with money you can afford to lose and never borrow to trade. Understand the risks before trading."

Here's the good news!

You don't need to be right 100% of the time when trading. Do the best traders win 80% of their trades? Not even close. Even a professional trading strategy may, in fact, suffer a 5-trade losing streak, or worse, at some point. The difference between successful and unsuccessful traders is that successful ones win more on their winning trades than they lose on their losing trades.

Trading success does NOT depend on just being right more than 50% of the time. Success depends on controlling and cutting the losses quickly AND letting the profitable trades run their course.
